

## Schools Implementing Social Kids

*Thank you for taking the necessary steps to forewarn and properly prepare our children for the digital world.*

We supply facilitator guides for educators that help them navigate any possible questions and offer suitable answers.

Personalised certificates & sticky badges can be handed out in class for a small printing and courier cost. This will add to the experience in class.

### What do you need:

- Access to Wi-Fi or the internet
- A screen and sound
- Printing capabilities

### The Process:

The digital adventures are best suited for Grade R to 3, depending on their online maturity. This has been specifically designed for younger children, under 11 years old. Each class teacher will need to register as a class.

After registering, you have access to 5 pre-recorded video adventures (20 - 25 mins each), activities, parent guides and facilitator guides.

The activities can be printed and shared with children after each video.

Parent Guides are in PDF and can be emailed or sent via WhatsApp to parents to help manage healthy digital habits at home.

Should you wish the kids to receive **Achievement Certificates** after the adventure, Email all the students' names to Codey Crawler, and we will send you electronic certificates to be printed.

We offer printed **sticky badges** for each adventure level that students can receive after each video, to add to the experience in class.

This comes with a small printing and courier cost.

#### **Potential costs example:**

- R65 x 100 Students = R6 500. 00
- Courier = R 200.00

At the end of the adventure, we ask for a testimonial on the experience.

We also welcome any donations to help us improve the program going forward.
